Profile

Systems Engineer at EdgeVerve with experience in the FinTech domain, specializing in Finacle customization and core banking solutions. Proficient in JavaScript, GitHub, PostgreSQL, Kubernetes, and AWS, with certifications in AWS Cloud Practitioner and AWS Developer – Associate. Passionate about cloud computing, DevOps, and building scalable, secure, and efficient cloud-native solutions.

Professional Experience

Systems Engineer | EdgeVerve Aug 2025 – Present

- Customize Finacle banking applications to meet client-specific business requirements.
- Develop and modify JavaScript-based Finacle scripts to implement custom functionalities and alerts.
- Work with Finacle 10x and 11x, gaining experience in core banking product customization.
- Use GitHub for version control, code management, and team collaboration.
- Utilize PuTTY and PostgreSQL for development and database-related activities.
- Gain hands-on experience with POD environments, Kubernetes clusters, and cloud-based infrastructure.
- Apply techno-functional knowledge to translate banking workflows and client requirements into technical solutions.

Intern | EdgeVerve Feb 2025 – July 2025

- Developed foundational knowledge of FinTech, core banking operations, and Finacle products.
- Learned JavaScript-based Finacle scripting for banking application customization.
- Created and configured menus within Finacle banking applications.
- Gained foundational knowledge of Oracle Database and its role in banking systems.
- Developed techno-functional understanding of banking workflows and software implementation.
- Explored Finacle functionalities and client-specific customization requirements.

Education

- **Bachelor of Engineering (B.E.)**
  Dr. D.Y. Patil Institute of Technology, Pimpri, Pune. CGPA - 9.30 , 2021 – 2025

- **Higher Secondary Certificate (HSC)**
  Vidyadham Science Junior College, Chh. Sambhajinagar. Percentage - 97.67% , 2020 - 2021

- **Secondary School Certificate (SSC)**
  Rising Star School, Chh. Sambhajinagar. Percentage - 95.60% , 2018 – 2019

Certifications

- AWS Certified Cloud Practitioner (CLF-C02)
- AWS Certified Developer – Associate (DVA-C02)

Technical Skills

- Programming Languages: C, Python, Java, JavaScript, SQL
- Cloud Technologies: AWS (IAM, EC2, S3, CloudFront, DynamoDB, SNS)
- Databases: MySQL, Oracle, PostgresSQL, NoSQL Databases
- Operating Systems: Linux (Ubuntu Basics)
- Version Control: Git, GitHub
- Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Operating System Concepts, Networking Fundamentals, CI/CD

Relevant Projects

1. Debt Collection Using Generative AI

- Built a full-stack app for managing borrowers and automating loan payment reminders.
- Designed a React.js frontend for viewing borrower details and sending reminders.
- Developed Django APIs to handle data, generate emails with Cohere AI, and send them via SMTP.
- Ensured reliable data handling using Pandas and generated test data with Faker.
- Implemented error handling, duplicate filtering, and date formatting for accurate email delivery.

2. Movie Recommendation System

- Developed a content-based movie recommender system leveraging cosine similarity to measure similarity between movie features such as genre, cast, and plot.
- Utilized feature extraction and vectorization techniques (e.g., TF-IDF, metadata encoding) to build user and item profiles for personalized movie recommendations.
- Explored machine learning models and statistical methods to predict movie popularity and target audience segments, addressing cold-start and over-specialization challenges.

3. Women Safety Analytics

- Developed a real-time gesture recognition system using webcam input and hand landmark tracking.
- Detected distress wave gestures and triggered automatic SOS emails.
- Included the device's local IP in alerts to simulate emergency communication.
- Secured email dispatch via SMTP with app-password authentication.
- Backend structured for future integration with location databases or frontends.

4. Pharmacy Management System

- Developed a Pharmacy Management System to efficiently handle medicine records, including adding, updating, deleting, and retrieving medicine details.
- Implemented the DAO (Data Access Object) pattern to separate database operations from business logic, ensuring maintainability and scalability.
- Utilized JDBC with MySQL for seamless database connectivity and Prepared Statements to prevent SQL injection. Integrated stored procedures using Callable Statement to optimize database queries and enhance performance.
- Designed a user-friendly console-based interface for pharmacists to manage medicines effectively.

Declaration

- I do hereby declare that are above information is true to the best of my knowledge.
